

Timing Component Kits

Gates Timing Kits are Top Choice with Customers

Gates is the only manufacturer approved by virtually every major OEM to provide timing belts for new engines. This means that Gates is able to cover the aftermarket with timing belts that are OE-equivalent or better in service life and performance. At Gates, the definition of quality is simple and straightforward -- "To meet or exceed customer expectations with products, services and experiences that are superior to the competition." Around the world, Gates operations meet the highest quality standards, including ISO and QS-9000.

Tech Specs -

Each kit contains:

- Belts
- Idlers
- Tensioner pulleys
- Installation instructions

Key Features:

- Tough, wear-resistant fabric on working surfaces.
- Special materials resist oil and engine heat.
- High tensile strength cord construction minimizes stretch.

Top reasons to replace belt tensioner and idler when replacing the timing belt:

- Preventative maintenance should address all forms of failure.
- After around 50,000 miles, tensioners are more likely to fail (especially after installation and adjustment of new belt).
- Labor costs associated with belt replacement are expensive, so it makes economic sense to replace all components at the same time.
- A worn or loose pulley can cause belt problems.
- Normal tensions cannot be maintained to assure proper life of replacement belt.
- Internal bearing wear is not noticeable.
- 45% of all timing failures are associated with not replacing components during the belt service interval.
- **All timing systems are designed to have all components replaced at the OE recommended service interval.**

Applications Supported -

Available for Asian and Domestic Applications

Manufacturer Information -

Founded in 1911, Gates serves customers in the industrial and automotive markets with a full line of belt and hose products. It is the only non-tire producing rubber company with sales and manufacturing operations in all of the world's major markets, including North America, Europe, Asia, Australia and South America. Around the world, Gates operations meet the highest quality standards, including ISO and QS-9000.

Timing System Display

Educate Customers on the Benefits of a Complete Timing System Repair.

Gates interactive Timing Component System Display engages and educates customers, helping service centers to increase sales of complete timing system repairs.

\$150.00

Order Part # 91035 to get your Display Kit.

Actual display size: 12" x 26 1/2"

Can be used on the counter or mounted to the wall.

Timing System Kit Includes:

- Interactive Timing System Display
- \$50 rebate (with purchase of two Gates Timing Component Kits)
- Autodata Timing Belt Manual
- Consumer take-one brochures
- Recommended Timing Belt Replacement Interval Poster
- Timing Belt Replacement Interval Guide
- Tips describing how to sell the entire Timing System

\$255.00 kit value

Limited-time offer while supplies last

Timing Component Kits Application Chart

No one comes close to Gates Original Equipment (OE) Timing Belts.

Today, Gates is the world's largest manufacturer of Timing Belts and Timing Component Kits. And not just for domestic vehicles, but for Asian and European manufacturers like Toyota, Honda, Volkswagen and Audi.

Timing Component Kits

- **SAME WARRANTY** as the recommended OE replacement interval.
- Popular kits covering over 30 million import vehicles include actual OE tensioners and idlers.
- Total solution for any application, including belts, idler(s), tensioners and supporting hardware with detailed installation instructions.
- Great convenience. Ease of parts sourcing. Reduced customer comebacks.

Genuine OE Components. When you see the Genuine OE Component sticker on the box you are guaranteed the tensioners and idlers in the box are what came on the car originally. All other kits come with OE quality components.
