

# Porsche Low Temperature Thermostat

## Motorad Keeping it Cool with Porsche

Motorad is an OE supplier of thermostats for many carlines including Porsche. Porsche OE thermostats do not begin to open until temperatures rise to 180 degrees. This low temperature thermostat opens at 160 degrees allowing the engine to run at cooler temperatures without effecting engine performance.

### ***Tech Specs -***

- Factory made housing, not modified
- Factory produced insert to allow the opening of the thermostat at 160 degrees
- Low temperature thermostats support cooler engine temperatures
- Low temperature thermostats support lower engine oil temperatures, a great benefit especially for models with Tiptronic transmissions.

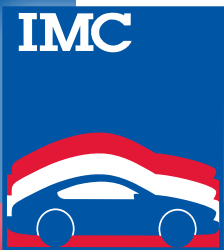

### ***Applications Supported -***

Part number 460 160 fits all 986/987 ( Boxster/Cayman ) as well as 996/997 ( 911 ) models to model year 2008. The low temperature thermostat replaces part numbers 996 106 013 59.

***Does NOT fit GT2, GT3 or Turbo Engines.***

### ***Manufacturer Information -***

The Motorad line of thermostats is one of the most sophisticated and advanced in the Automotive Industries. State-of-the-art equipment, strict quality control, and functional testing of each thermostat ensures customers that they can trust the Motorad product used in their vehicle.
